Our workshops are equipped with 6 overhead cranes (3 x 10 tonne & 3 x 5 tonne) and a range of specialized equipment to ensure full control is maintained over projects at all times.

Our workshop facilities have the capability to produce over 4,000-man hours per Month.

# We can produce...

- Weld testing as required
- Combined machined and welded components
- 4000-man hours a Month
- 200 tonne per month
- Pick up and delivery of multiple tonne loads to local or remote Area
- Large and small pipe spooling to reduce installation cost and time

# Quality, OH&S and Efficiency

At HF, our commitment lies in delivering top-tier Fabrication and Engineering services to our clients. We adhere to established systems to ensure Occupational Health and Safety standards are met and constantly evolving, all while always striving for optimal efficiency.

## One model

Our approach revolves around working alongside you and your team on-site, fully committed to realising your objectives

## One sector focus

We are experts in the sectors we service and understand the procedures, policies and culture of these sectors

## The right skills

We combine big-picture strategy with attention to detail in implementation

## The right people

We are technically excellent, strategic, practical, experienced and efficient; our advisors are hand-picked based on having the right attributes to work successfully with your team

## The right experience

We have advised clients on some of the most complex and high-profile matters in Australia.

Management, Staff & Trades strive to attain the highest levels of quality throughout all facets of the business operations. We manage continual improvement through constant interrogation of the integrated Management System and feedback from Clients and employees alike.

# Specialised Fabrication Materials & Welding

At HF, Our goal is to meet client needs and expectations by providing outstanding quality and continuous satisfactory services at affordable price.

## Fabrication & Welding

The team at HF have completed a broad range of custom fabrication and welding projects.

We have the capability to perform any task regardless of the complexity and our ability to deploy a team of expert welders, allow us to complete projects that are quite complex in a short period of time, at the highest quality.

If you have an upcoming fabrication and welding project and need some external help to get the job done

Please contact HF for a complimentary quotation.

## Material experience

HF have acquired extensive experience in the manufacture of products from a variety of materials as follows:

- Structural and pressure vessel steels including low temperature and quenched & tempered steels.
- Ferritic, austenitic, super austenitic (6Mo), duplex and super-duplex (2507 & Zeron 100) stainless steels.
- Engineering steels, such as 4140, 4130 & 1040
- Cast iron.
- Chrome moly in grades P91, P22 and P11.
- Nickel alloys such as Monel, Inconel and Incoloy.
- Non-ferrous materials such as copper-nickel, aluminium and titanium.
- Proprietary materials such as Maggoteaux, Sandvik SX & 3CR12, HA.

# HENDERSON FABRICATION

*“Are you looking for professional crew to finish your project?”*

*“Rely on our team of highly experienced fabricators and welders”*

# Health, Safety, Environment & Training

HF are fully committed to healthy and safe workplace. Our well running operation provides high quality delivery and enables our team to achieve continual improvement.

## Health & Safety

HF's focus on responsible management of health, safety, the environment and suitably trained personnel enable further cost control and schedule management of complex project deliverables.

It is our conviction that, in addition to reducing individual suffering and loss or environmental impact, safe work practices will contribute directly to the efficiency and success of our business. We therefore take into consideration the requirements of ISO 14001:2015 Environmental Management Systems & ISO 45001:2018 Occupational Health & Safety Management Systems.

## Training

The work environment, infrastructure and training needs are permanent agenda items for the Management Review Meeting and are therefore tabled for assessment and discussion during that forum.

All employees are suitably trained, qualified or certified as necessary and continual training is provided to meet equipment, process and technological changes in industry. HF are proud supporters of the apprenticeship system in Western Australia and have maintained employee apprentices since inception.

# Thanks for your time.

We're here to help.  
Feel free to reach out, to discuss your  
upcoming projects.
